

ChiliProject - Bug # 586: TabularFormBuilder doesn't work with subforms

Status:	Closed	Priority:	Normal
Author:	Felix Schäfer	Category:	
Created:	2011-08-18	Assignee:	
Updated:	2011-08-22	Due date:	
Remote issue URL:			
Affected version:	master		
Description:	The tabular form builder produces labels with the @for@ attribute set to @object[sub_object_attributes][5]_title@ instead of the expected @object_sub_object_attributes_5_title@.
