

## ChiliProject - Feature # 608: Issue column totals

<b>Status:</b>	Open	<b>Priority:</b>	Normal
<b>Author:</b>	James Robertson	<b>Category:</b>	Issue tracking
<b>Created:</b>	2011-09-05	<b>Assignee:</b>	
<b>Updated:</b>	2012-11-21	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>	It would be very helpful to display a total for any/every column of an issue list/custom query that contains a numeric field.  The oft quoted example for this is the 'Estimated Time' field, but really it is potentially useful for any numeric field. For example, we have a Story Points custom field for some of our Trackers and it would be very helpful to be able to see how many Story Points have been allocated against a particular status or version for example (maybe using the 'group by' option).  Ideally both the total for the current page and total for all pages (perhaps in brackets) should be shown (as per <a href="http://www.redmine.org/issues/4776">http://www.redmine.org/issues/4776</a> - except not just for Estimated Time field)

- File *redmine\_totals.user.js* added

I have hacked together a Greasemonkey/Scriptish user script for adding totals to any numeric column in the Issue list, browser-side. I've provided the script here in case it's of any use to anyone else. Warning, it's pretty fragile and relies on the table structure and class names remaining constant. I hope someone finds it useful and /or wants to make it better :-)

I used to use "the redmine-4776 patch": <http://www.redmine.org/issues/4776>

Maybe it can be applied to Redmine?

#### 2012-11-05 12:42 pm - Christophe Deliens

+1 for this feature request. Right now, we have to export to Excel to make a simple SUM of "Estimated time". Thx!

#### 2012-11-21 01:40 am - Guillaume Bourque

+ 1 for me also !
