ChiliProject - Feature # 625: associated revisions: include repository name

Status:	Open		**Priority:**	Normal
Author:	pille palle		**Category:**	
Created:	2011-09-15		**Assignee:**	
Updated:	2011-09-15		**Due date:**	
Remote issue URL:				
Affected version:	2.1.1			
Description:	please include the repository name of the revision.			
	we use several repositories. some are clones of another for different deployment targets and thus contain the same revisions.			
	it would be nice, too if you can include the whole commit-message, repository and revision in the comments added to history instead of _"Applied in changeset commit:..."_			
	please make a link of the _"commit:..."_ part to the revision.
