ChiliProject - Bug # 629: lists inside a table wreak havoc on tha table layout

Status:	Open	**Priority:**	Normal
Author:	Ruben Willems	**Category:**	Wikis
Created:	2011-09-17	**Assignee:**	
Updated:	2011-09-17	**Due date:**	

Remote issue URL:	
Affected version:	2.2.0
Description:	the following layout gives problems
	| col1 | col2 | col 3 |
	| some data | a list with items
	* item 1
	* item 2
	* item 3 |
	some other data |
	| row 2 data | bla bla | ho ho ho |
	for the moment I bypass this by placing the list a in a pre section,
	but this also gives problems. the table does not wrap anymore when it hits the window edge.
	Resulting in a scrollbar.
