Here are two DB entries for a working (id=943) and not working (id=942) issue in case there is some problem with the DB:

The issues come from a recent migration from trac to chiliproject.  
Please let me know if you need further info to analyze the problem.

Fixes:

- \* email notifications: host name is missing in generated links (#639, #201)
- \* email notifications: referenced changesets, wiki pages, attachments... are not turned into links (only ticket ids are)
- \* attachment links and inline images don't work in issue notes
