

## ChiliProject - Bug # 64: Forums list shows even if the forum module is not active

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Felix Schäfer	<b>Category:</b>	Forums
<b>Created:</b>	2011-01-16	<b>Assignee:</b>	Felix Schäfer
<b>Updated:</b>	2011-02-27	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>	It seems the forums list doesn't check for activation of the module, see "the boards page here":/projects/chiliproject/boards.

Can you check this on a local copy? The forums module is \*enabled\* but I haven't created any forums yet (see #34).

Ok, just tested locally, and the boards link throws a 403 if the module isn't active, it shows an empty list of boards when the module is active but no board has been configured yet. In comparison, the wiki link throws a 404 if the module isn't active and there is no wiki configured.

Would a 404 be OK in the case "forum module active" but "no board configured"?

**2011-02-22 11:58 pm - Eric Davis**

I think 404 would be right for when the module [isn't active] or [it is active with no boards]. That means ChiliProject can't find (404) an active Forum module and it can't find a board.

- Status changed from Open to Closed

Committed a fix to 404 of board index with no board configured and a test for it in commit:7e99e2714b6c77751e044129be263d642676e373.
