

ChiliProject - Feature # 654: Captions / Page titles and Breadcrumb

Status:	Open	Priority:	Normal
Author:	Romano Licker	Category:	User interface
Created:	2011-10-12	Assignee:	
Updated:	2011-11-07	Due date:	
Remote issue URL:			
Affected version:	2.3.0		
Description:	<p>The caption of a page (meaning the title of a menu-item) is sometimes not displayed (Wiki/Repository) or is being replaced with another title like in Issues - #someissue, where "Issues" is replaced by "'Bug #651". E.g. : Caption "Issues" on https://www.chiliproject.org/projects/chiliproject/issues and caption on https://www.chiliproject.org/issues/651</p> <p>For the new design we thought about that and came up with two proposals:</p> <ol style="list-style-type: none">1. We remove the title of a module from the main content and extend the project breadcrumb. This way we have a single breadcrumb which indicates where we are in the project and from there, where we are in the system. E.g. "Chiliproject >> Chiliproject-Sub-Project >> Issues >> New Issue"2. Instead of replacing the modul name (like in Issues) we extend it gradually "Issues >> Bug #546" having a similar behavior like in the Wikipages (and their subpages). <p>What are your thoughts about this? Feel free to share.</p> <p>Romano</p>		

History

2011-10-29 03:49 pm - Felix Schäfer

- Target version changed from 2.4.0 to 3.0.0

Not sure about having something "breadcrumb-ish" in the title.

Removing from version#17 anyway because it's more in scope with the design change.

2011-11-07 01:34 am - Eric Davis

- Target version deleted (3.0.0)

Going from general to specific would make the title less useful for me ("ChiliProject > Sub-Project > Issues > New Issue"). When you have multiple tabs open they get truncated so all you would see is "ChiliProje.." "ChiliProje.." "ChiliProje..".

Going from specific to general would be better but I really don't see what that would improve.

I guess I need to see the code before I can make a call on this.

(Removing from 3.0.0: there is no patch ready for review and there is no final decision on how to approach it)
