

ChiliProject - Bug # 664: Replace Background images that contain crucial information with

Status:	Open	Priority:	Normal
Author:	Romano Licker	Category:	User interface
Created:	2011-10-17	Assignee:	Romano Licker
Updated:	2011-10-25	Due date:	
Remote issue URL:			
Affected version:			
Description: Accessibility flaw for blind users: There are images that contain information implemented as background-images using css-styles. Screen-Readers ignore background images and on top of that the alt-tag is missing. They have no access to this information which makes the website often incomprehensible or incomplete for them. Consequently background-images need to be replace with img-tags with valid "alt" description.			

History
