<b>Description:</b> The 'View all projects page' shows all projects in their hierarchy.  Having many projects of projects the project tree degenerates fast. On top of that some have a description, some have large texts with links, some have none. This results in a very hard to read overloaded page.

Checkout "Progressive Projects List":<http://stgeneral.github.com/redmine-progressive-projects-list/> plugin. It allows to turn off show project description and optionally show project progress instead.
