ChiliProject - Feature # 701: Private Issues and Private Comments

Status:	Declined	**Priority:**	Normal
Author:	Simon Stearn	**Category:**	
Created:	2011-11-15	**Assignee:**	
Updated:	2011-11-15	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	Is there a plan to pull in these features (initially included in Redmine 1.2 and due to be enhanced later). These are important for anyone using a server for mixed internal and external communication scenarios.

Associated revisions

2008-02-21 06:50 pm - Jean-Philippe Lang

Fixed: Adding time when Updating a ticket is gone (closes #701).

We are not really convinced of the way this was implemented in Redmine. See #189 for more information.

For now you would have to use separate (sub-)projects. For most people, this is a good-enough workaround. And for all I'm aware of, this can almost fully replace the functionality Redmine provides. That said, we are aware that private issues (or more generically private objects) is a useful feature which we are going to implement once we have the necessary base work done.

Closing this issue as a duplicate of #189.
