

ChiliProject - Feature # 716: New Text Editor

Status:	Open	Priority:	Normal
Author:	Brian Jacobi	Category:	
Created:	2011-11-17	Assignee:	
Updated:	2013-06-22	Due date:	
Remote issue URL:			
Affected version:			
Description:	The current text editor is a bit limiting. In a system like Jira, users can paste in straight tables from excel or other applications.

+1 Sadly Chili misses a more comfortable editor (with WYSIWYG or comparable). As long term Trac user this missing feature is an extreme draw back :-)

The only way I solved that was to introduce a separate Wiki - a pity because you can't search it via Chili - which works awesome in Trac :-)

+1 for WYSIWYG wiki editor

2012-07-22 10:57 pm - Tomáš Jukin

+1 for CodeMirror (<http://codemirror.net/>), there is even a Rails gem aout there for it: <https://github.com/fixlr/codemirror-rails> - CodeMirror is not a WYSIWYG, but it is awesome (and is has support for every WYSIWYM syntax markdown/textile/...

or

If we want a WYSIWYG best option would be Rich, which is an updated variant of CKEditor. Rich is also available as a gem - <https://github.com/bastiaanterhorst/rich>

Additional Info:

Currently a Textile-based WYSIWYG editor is available in a very early / alpha version for Redmine:

<http://www.redmine.org/boards/3/topics/17852>

This is the IMHO best solution to satisfy users who want WYSIWIG and other users who still want textile syntax.
