- Category set to Text formatting

- Affected version set to 2.5.0

The culprit is in source:lib/redmine/wiki_formatting/textile/formatter.rb#L102.

Rails used to have an auto_link method in @ActionView::Helpers::TextHelper@ but it was removed in Rails 3.1. There exists a replacement for Rails >= 3.1 in the form of "rails_autolink":https://github.com/tenderlove/rails_autolink.

Until we are on Rails 3.1, we should use the @auto_link@ method of action_view and later swith to the mentioned gem.
