<b>Affected version:</b>			
<b>Description:</b>			
I've found no way of linking a file in a ticket comment or in the wiki.			
It may be useful to link patch / releases files within a ticket or from the wiki.			
I propose this format:			
* @file:<id>@ link to a file of the current project, by id			
* @file:"<name>"@ link to a file of the current project, by name			
* @sandbox:file:<id>@ link to a file of another project, by id			
* @sandbox:file:"<name>"@ link to a file of another project, by name			
I apologize if this is possible and I missed it.
