<b>Affected version:</b>			
<b>Description:</b>	It'd be nice to have a way to update revision information as discussed in: <a href="http://www.redmine.org/issues/1273">http://www.redmine.org/issues/1273</a>  For my specific use case ideally there'd be a command I can call from an svn hook (pre-revprop-change) to update the commit message of one revision or the revision history for one ticket.
