<b>Description:</b> Hi Holger,  could you please register chiliproject.es. Schlundtech provides the possibility to register Spanish domains. I would like to build a business in Spain based on hot open source chilis. It would be a big loss if the domain would not forward to chiliproject.org but to something unrelated such as a chili shop...  Thanks Wieland

- Target version deleted (Public Launch)

I think getting all of the TLD isn't needed. The .com and .org are all we need (and the main misspelled versions).

It's definitely not required for the Public Launch.
