

ChiliProject - Bug # 759: Custom Fields are not available in Time Entries Report

Status:	Open	Priority:	Normal
Author:	Josh Galvez	Category:	Time entries
Created:	2011-12-08	Assignee:	
Updated:	2011-12-08	Due date:	
Remote issue URL:			
Affected version: 2.3.0			
Description: Problem: Because we needed a "Category" field with one set enumerations across all of our projects we use a Custom Field called "Issue Category". If we browse to /time_entries/report for "All Projects" one can select the default "Category", but not any defined custom fields. Solution: List Custom Fields in the "Add:" drop down list.
