

ChiliProject - Bug # 762: "Send a test email" should override "don't notify of changes that I make myself"

Status:	Ready for review	Priority:	Normal
Author:	Sven Schwyn	Category:	Mail Sending
Created:	2011-12-10	Assignee:	Felix Schäfer
Updated:	2013-01-06	Due date:	
Remote issue URL:			
Affected version:			
Description: With "Settings -> Email Notifications -> Send a test email" an admin user can test the mail setup. However, if the admin user has "I don't want to be notified of changes that I make myself" checked on his account page, no test mail is sent. This can result in someone (me :) tracking down a mail configuration error which doesn't exist at all.			

History

Oops, the dashes were interpreted. Here's the text without strikethrough:

With "Settings / Email Notifications / Send a test email" an admin user can test the mail setup. However, if the admin user has "I don't want to be notified of changes that I make myself" checked on his account page, no test mail is sent. This can result in someone (me :) tracking down a mail configuration error which doesn't exist at all.

This patch WorksForMe

2012-02-16 05:00 pm - Yehuda Katz

I was going crazy over the same issue until I found this bug report. The patch works for me too.

2012-02-23 01:18 am - Gabriel Mazetto

Can we see this in 3.1.0?

2012-04-11 08:25 am - Vladislav Poluhin

Bug still exists at 3.1.

2013-01-05 05:30 pm - Thomas von Deyen

- *Assignee set to Felix Schäfer*

And it still even exist in 3.3.

This bug drives me crazy everytime I change E-Mail settings.

Could someone please apply the patch, because it's working.

Thanks!

2013-01-06 10:09 am - Felix Schäfer

- *Status changed from Open to Ready for review*

I hadn't even noticed the patch. To be honest it doesn't look very nice, but I guess that's the best we can get at without completely rewriting the thingâ€¦
