

ChiliProject - Bug # 773: Cmd+Click on Projects and More menus doesn't work

| | | | |
|--------------------------|---|------------------|----------------|
| Status: | Open | Priority: | Normal |
| Author: | Holger Just | Category: | User interface |
| Created: | 2011-12-18 | Assignee: | |
| Updated: | 2012-05-22 | Due date: | |
| Remote issue URL: | | | |
| Affected version: | 3.0.0 | | |
| Description: | Cmd+Click (supposed to open the link in a new tab) on the top menus doesn't work. It seems to swallow the click as it does exactly nothing. | | |
| | Firefox 8.0.1. on OSX 10.6.8 | | |

Well, here, on 10.7.3 it does:

not work with FF (9)

work with Chrome / Safari

Looking at Firequery, there is no event bound to that a, which and not even to the root element. I expect this to be a CSS menu then? Very odd indeed then.

- Target version deleted (3.0.0)

- Affected version set to 3.0.0

This is not a release blocker. Thus I'm postponing this.

2012-05-22 05:26 am - Andrew Smith

This is annoying to me as well. The event is caught in the application.js file around line 563

```
<pre>
$('#account-nav .drop-down').live('click', function(event) {
  var menuitem = $(this);

  toggleTopMenu(menuitem);

  if (menuitem.hasClass('open')) {
    handleClickEventOnPageToCloseOpenMenu(menuitem);
  }
  return false;
});
</pre>
```

Talk about a CSS menu has been mentioned in #764 . Updating the JS could also fix this as well (a simple check to see if ctrl/shift/cmd is being held at

the same time as the click).
