- Status changed from Open to Ready for review

Pull request is at <https://github.com/chiliproject/chiliproject/pull/148>

This adds some much needed visibility into how email is received. Now when someone sends an email to the system they will get a confirmation email back with a link to the object (issue, forum) or if it is unsuccessful or unauthorized a confirmation email is sent with error messages (e.g. missing data). The confirmations are also configurable in the admin settings if someone wants to turn them off (e.g. no confirmation for successful emails but have a confirmation for failed emails).

2011-12-29 07:53 pm - Eric Davis

- Target version set to 3.0.0

- Status changed from Ready for review to Closed

Merged into unstable in commit:00df8321261 and with a small patch in commit:e4554a6d7b7
