Updated:	2011-01-21	Due date:	
Remote issue URL:			
Description: Holger: We need an incoming email account to use for "reply via email". I'm using "app@" for now on outgoing email but I'm happy with anything that makes sense. Could you setup an IMAP account for me and send me the access information? Thanks

I vote chili@

2011-01-21 11:41 pm - Felix Schäfer

I think project@ is setup for this. Holger?

We use project@ for incoming and outgoing mail. Although, incoming mail is still disabled because of bugs. see #90.
