ChiliProject - Feature # 802: Allow groups to watch issues

Status:	Closed	**Priority:**	Normal
Author:	Eric Davis	**Category:**	Issue tracking
Created:	2011-12-28	**Assignee:**	Eric Davis
Updated:	2012-02-28	**Due date:**	
Remote issue URL:			
Affected version:			
Description:	This would include all of the group members on notifications but without having to manually add the users. The group watcher would also function as a unit: removing it will remove all of the users as watchers.

We have 3.0 running, but I can't seem to find this feature. Could you please give me a hint?

Thanks

Daniel

I just tried it on 3.0 and can add groups, have you created groups already? Do they maybe need to be a member of the project?
