

ChiliProject - Bug # 819: RAILS_ENV is not properly set if running under thin

Status:	Closed	Priority:	Normal
Author:	Holger Just	Category:	Libraries
Created:	2012-01-05	Assignee:	Holger Just
Updated:	2012-01-06	Due date:	
Remote issue URL:			
Affected version:	2.6.0		
Description:	With the @config.ru@ introduced in #789 thin starts Chili as a Rack app and consequently only sets @RACK_ENV@ instead of @RAILS_ENV@. This leads to ChiliProject starting in the default development mode.

- Status changed from Open to Closed

Fixed it in commit:4c0b195. Thanks to Ben Cooksley for finding the bug and helping me fix it.

Now thinking about whether this justifies a patch release or not. Any thoughts?
