

ChiliProject - Feature # 840: Incorporate Wiki-Rename options into Wiki Creation/Edit Page

Status:	Open	Priority:	Normal
Author:	Kris Lou	Category:	Wikis
Created:	2012-01-18	Assignee:	
Updated:	2012-01-18	Due date:	
Remote issue URL:			
Affected version:	2.5.0		
Description:	Not a high priority, but would it be possible to combine the Wiki Page Rename options into the base Wiki Creation/edit pages? In particular, I'd like to be able to change/add the page nesting/parent-child when I create pages without saving the page, and going back into the Rename options.
