

ChiliProject - Bug # 846: Modify redmine_client to work with chiliproject

Status:	Declined	Priority:	Normal
Author:	Eugene ineu	Category:	
Created:	2012-01-25	Assignee:	
Updated:	2012-05-19	Due date:	
Remote issue URL:			
Affected version:			
Description: Currently redmine_client from https://github.com/edavis10/redmine_client doesn't support even authentication via X-Redmine-API-Key, which in it's turn was changed in https://www.chiliproject.org/issues/129#note-5 to X-ChiliProject-API-Key. Support for X-Redmine-API-Key was proposed in https://github.com/edavis10/redmine_client/pull/1 . Support for X-ChiliProject-API-Key is as easy as adding one extra header to this patch. Is it possible that such feature can be added to redmine_client?

Hi Eugene,

Although Eric is a maintainer of both projects, this tracker is for ChiliProject, not the redmine_client gem. Please see "this issue":<https://projects.littlestreamsoftware.com/issues/5742> on Eric's tracker, thanks.
