ChiliProject - Task # 860: Return a status 403 for guests on denied access

Status:	Open	Priority:	Low
Author:	E M	Category:	Permissions
Created:	2012-02-02	Assignee:	
Updated:	2012-02-02	Due date:	

Remote issue URL:	
Description:	Guest, which try to access a url which is not permitted for them, get a login-page usually. E.g. trying to download a attachment which is in a private repo. What happens is, we return a status 200 + login page, which should be rather 403+login page.

Associated revisions

2008-03-15 11:30 am - Jean-Philippe Lang

Mercurial adapter:

* fetch changesets by batches of 100 (rather than in a single transaction)

* fix: fetch_changesets tries to re-insert the last revision that exists in the db (#860)
