

ChiliProject - Bug # 866: Invalid hostname in email footer

Status:	Closed	Priority:	Normal
Author:	John Parker	Category:	
Created:	2012-02-06	Assignee:	
Updated:	2012-02-06	Due date:	
Remote issue URL:			
Affected version:			
Description: The email footer for account activation and for chiliproject test both contain the following: "You have received this notification because you have either subscribed to it, or are involved in it. To change your notification preferences, please click here: http://hostname/my/account " The url contains an invalid hostname. The hostname, set at example.com/settings, General tab, Host name and path field, does appear correctly in the mail body.
