

ChiliProject - Bug # 898: configure syntax highlighting based on file extension

Status:	Open	Priority:	Normal
Author:	Lev Tsypin	Category:	
Created:	2012-02-16	Assignee:	
Updated:	2012-02-16	Due date:	
Remote issue URL:			
Affected version:			
Description:	E.g., we're doing a bunch of Drupal development, and many of our PHP files are .include, .module, .test, etc. These are treated as plain text rather than PHP. Would be nice to map extensions / file types to a language.
