ChiliProject - Feature # 901: PDF export of Wiki Pages

Status:	Open	**Priority:**	Normal
Author:	Saeed Richardson	**Category:**	Wikis
Created:	2012-02-19	**Assignee:**	
Updated:	2013-05-06	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	We can currently export the contents of a list of issues to PDF. This type of functionality on the wiki pages would also be a great asset to use as well in addition to the ATOM, HTML, and TXT options.

History

It's related to this in redmine : http://www.redmine.org/issues/401

this feature from r7739 to r7742.

and for rmagick (http://www.redmine.org/issues/3261) and r7788, r7810. (As I can see in tickets)

2012-02-23 12:37 pm - Saeed Richardson

Thanks for the update. Do you know if anyone has successfully applied this? I'm certain I'll try.

Looks like it actually came through for redmine; I hope it's in the plans for ChiliProject.

2012-03-14 02:39 am - Saeed Richardson

Sorry to ask this again but are there plans to incorporate these updates into ChiliProject?

2012-06-19 03:41 pm - Scott Whitlow

I was wondering if this is going to be implemented? This would be a great feature!

2013-04-25 01:41 pm - Václav Stodůlka

Please please, someone add this feature to some further release. We have manuals on Wiki, exporting through HTML is not very comfortable...

2013-05-06 11:07 pm - Chris Dähn

Hi,

there is a chili_pdf gem/extension for exactly that...

https://github.com/tomkersten/chili_pdf - see #488

Currently the install instructions are outdated and I failed to get it running on Debian Squeeze...
