

## ChiliProject - Feature # 906: Add Link back to Parent of Subtask

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	A Samz	<b>Category:</b>	User interface
<b>Created:</b>	2012-02-27	<b>Assignee:</b>	
<b>Updated:</b>	2012-04-05	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>	3.0.0		
<b>Description:</b>	Great job on this project. We just installed 3.0.0 in our QA environment to give it a test and one thing that we found we really missed from Redmine is the ability to link back to a parent of a subtask.  This really makes the workflow of setting up subtasks for larger requests smooth and easy. As such I'd like to ask for this feature.

Issue hierarchy on issue show view #906

### History

---

#### 2012-02-27 03:11 pm - A Samz

I for got to mention that I uploaded a screen capture from Redmine of this functionality. Pictures being worth a 1,000 words and what-not.

#### 2012-03-01 01:02 am - Felix Schäfer

Thanks for the report, it seems it's been lost in the redesign/retheming.

Romano, was there some specific plan to show parent issues?

#### 2012-03-14 12:01 pm - Chris Dähn

Hi,

I experienced the missing links already after upgrading to 2.6.0 - in the former 2.5.0 release the links are displayed and it was possible to create subtasks, which doesn't work any more since 2.6.0.

Is this a known bug?

ciao,

Chris

#### 2012-03-15 11:45 pm - Felix Schäfer

- Target version set to 3.1.0

- Assignee set to Felix Schäfer

- Affected version set to 3.0.0

This is indeed a bug, I have a patch I need to review and ask someone else to review and commit afterwards.

**2012-03-17 02:38 pm - Felix Schäfer**

- Assignee deleted (*Felix Schäfer*)

- Status changed from *Open* to *Ready for review*

- File *simple\_tree.png* added

I've reworked the subissues section on the issue view to show the parents and subtree at once, see:

!simple\_tree.png!

Corresponding "pull request":<https://github.com/chiliproject/chiliproject/pull/163>

(This is also based on work from Romano, thanks!)

**2012-03-20 09:24 am - Felix Schäfer**

- Status changed from *Ready for review* to *Closed*

Committed in commit:565aeabc79.

**2012-03-20 01:46 pm - Guillaume Bourque**

Hi Felix,

I'm not a dev so maybe I missed a step, I did a clone on the repo

>git clone git://github.com/chiliproject/chiliproject.git

Then swithc to the master branch where this commit is available I think !

> git checkout master

Then I can verify that I have the new files I have check this file

> vi config/locales/en.yml

And I see the new lines so I should be fine.

I connect to this test version of chili in English or french but stil dont see parent task.

Any idea what I could be missing ( i did a migration bundle exec rake db:migrate RAILS\_ENV=production )

Thanks

**2012-03-20 01:51 pm - Guillaume Bourque**

Hi,

Ok I see now, from the parent Task we see the childs this is perfect.

But from the child we don't see that we have a parent and this is very interesting to have too, well I think

Thanks

**2012-03-20 04:20 pm - Felix Schäfer**

I just tested on master, the "Issue hierarchy" section should show the parents, the issue itself and its subtree (if either or both parents or a subtree exist), the issue itself in the tree is shown in black text instead of red text.

**2012-03-20 10:00 pm - Gregor Schmidt**

#788 is a duplicate of this issue.

Well this is not what I see on my updated chiliproject 3.0, i will try on a new install and reports what I see.

thanks for the great work.

Guillaume

Hi,

as I mentioned before ADDING new subtickets still fails since version 2.6.0 - now tested with 3.1.0 and same problem.

I even tested it with old tickets which have subtickets where this problem still occurs.

Has somebody removed the functionality for creating subtickets?

ciao,

Chris
