

## ChiliProject - Bug # 908: Whitespace normalization shouldn't trigger journals

<b>Status:</b>	Open	<b>Priority:</b>	Normal
<b>Author:</b>	Holger Just	<b>Category:</b>	Journals / History
<b>Created:</b>	2012-02-27	<b>Assignee:</b>	
<b>Updated:</b>	2012-02-28	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b> On an update of #867, the description wasn't actually changed but instead (I assume) only whitespace (probably line-breaks) was normalized. This should not trigger new journals.  Instead, changes should always be computed from normalized values.			

### History

I believe you meant to reference #907.

The diff of the "update" is at <https://www.chiliproject.org/journals/14745/diff/description>

It appears that the only change is a leading newline, which shows up as a <br> wrapped in a <span> with class="diff\_out" in the HTML source.
