

ChiliProject - Task # 91: Add the custom CSS classes used by the documentation to the theme

| | | | |
|--------------------------|--|------------------|-----------------------------|
| Status: | Closed | Priority: | Normal |
| Author: | Holger Just | Category: | ChiliProject - Organization |
| Created: | 2011-01-21 | Assignee: | Eric Davis |
| Updated: | 2011-01-31 | Due date: | |
| Remote issue URL: | | | |
| Description: | See [[CSS_classes_to_add]] for a list of the required CSS classes. The final blocks should like quite like on "docs.redmicht.com": http://docs.redmicht.com/projects/docs/wiki | | |

History

2011-01-21 06:19 pm - Eric Davis

Just adding the classes won't help, I'll need the actual CSS rules too (e.g. `@.tip {border: 1px solid red}@`)

2011-01-22 12:18 am - Holger Just

@Eric: Yeah, I'm going to rip them out of docs.redmicht.com and send you a pull request for the theme.

I just pushed the classes to my github and send you (Eric) a pull request. Please update the theme here.

There is a CSS conflict with the `@.info@` class with an existing class: `@#admin-menu a.info@`.

2011-01-24 09:51 pm - Holger Just

Okay, I just updated the branch. I now qualified the classes with `@p.@` and `@span.@` which is the only way they are used currently. If the classes are used on other elements, these have to be updated, but I don't really see it anytime soon.

- *Category set to ChiliProject - Organization*

- *Status set to Closed*

Pulled, merged, and deployed. We now have pretty wiki icons to use :)
