ChiliProject - Feature # 916: Option to disable or redirect the Help menu option

Status:	Open	**Priority:**	Normal
Author:	Wiki Bit	**Category:**	
Created:	2012-03-02	**Assignee:**	
Updated:	2013-01-23	**Due date:**	

Remote issue URL:	
Affected version:	3.0.0
Description:	Is there a way to disable the "HELP" menu button?
	We just want to avoid users to get to the outside help for Chiliproject, and in stead use our internal help.
	So, an admin option to disable de help menu (or redirect it to another webpage maybe) would be nice.
	Since it is not yet there, can anyone point me in the right direction to disable it manually?
	WB

If you would like to change the link, you will find it under help_url in /lib/chili_project/info.rb.

If you would like to disable it entirely, you can remove line 77 of /app/views/layouts/base.rhtml:

  <%= render_menu_node(help_menu_item) %>

That should tide you over until someone (me, if I find myself with a few spare minutes) can write a full patch for making it editable.

any chance this can make it in the 3.6.0 release?
