

ChiliProject - Feature # 923: Option to force repository update

Status:	Open	Priority:	Normal
Author:	Yehuda Katz	Category:	SCM
Created:	2012-03-07	Assignee:	
Updated:	2012-03-07	Due date:	
Remote issue URL:			
Affected version:			
Description:	Users with manager privilege should be able to force a full repository update (the same as calling /sys/fetch_changesets) with a link on the repository page. I am not sure how complicated that would be.		

Associated revisions

History

2012-03-07 05:16 pm - Felix Schäfer

Depending on what you call a "full" repo update, this already exists, albeit not as a button.

The @fetch_changesets@ functions is called every time any user opens any repository page in the project if the "auto-update" feature is checked in the global administration (which IIRC it is by default).

2012-03-07 05:25 pm - Yehuda Katz

I had "auto-update" checked, but for some reason the repository was not being updated.

I have one SVN and two GIT repositories and none were being updated unless I called the @/sys/fetch_changesets@ url directly (I added it to my SVN post commit hooks, but I can't get every developer to do that).
