<b>Remote issue URL:</b>			
<b>Affected version:</b>	3.0.0		
<b>Description:</b>	Hi!  I've used task hierarchy in ChiliProject 2.2. Tasks displayed in a nice tree structure.  But after an update to 3.0 tasks started to display in a plain list.  I've investigated the CSS and discovered that left padding of subtasks gets overridden by padding in another rule.  After updating the rules with @!important@, tree structure is back!  See the attached screenshot for comparison.  Patch also included.		

### History

**2012-03-08 08:54 pm - Andrey Mikhaylov**

- Target version deleted (3.1.0)

Ah... I should've set the affected version to 3.0. And now i can't find where to change it.

**2012-03-22 12:53 am - Andrew Smith**

I'm pretty sure this is related to #911 as well. The solution there is to add #content to all of the rules instead of !important (using !important is generally not recommended).

**2012-03-22 08:34 am - Felix Schäfer**

- Affected version set to 3.0.0

- Status changed from Open to Duplicate

As far as I can see this is a duplicate of #911 and has been fixed in master, thanks for reporting!
