

ChiliProject - Bug # 927: Reposman script problem

Status:	Closed	Priority:	Normal
Author:	Simon Stearn	Category:	
Created:	2012-03-09	Assignee:	
Updated:	2012-03-27	Due date:	
Remote issue URL:			
Affected version:			
Description:	The Project class used to be defined (round about line 190+) as: <pre>class Project < ActiveResource::Base self.headers["User-agent"] = "Redmine repository manager/#{Version}" self.format = :xml end</pre> However the :ml format setting has gone (at least in 3.0.0) which has the effect that the script barfs on XML returned from /sys. The fix (in our environment using subversion etc) is to revert to the above definition.

Sorry, last line should read -

However the `:_xml_` format setting has gone (at least in 3.0.0) which has the effect that the script barfs on XML returned from /sys. The fix (in our environment using subversion etc) is to revert to the above definition.

Hello Simon,

I can't find anywhere in the near history that that line was ever present, could you point me to your source?

2012-03-26 04:03 pm - Simon Stearn

Felix

Sorry for the slow reply. I am not 100% on exactly what I was looking at when I worked on this. I suspect I was actually looking at redmine repository which of course will be different. Checkout line 195 here:

<http://www.redmine.org/projects/redmine/repository/entry/branches/1.3-stable/extra/svn/reposman.rb>

2012-03-27 10:53 am - Felix Schäfer

- *Target version set to 3.1.0*

- *Status changed from Open to Closed*

I've been able to reproduce this in an IRB session and have merged the fix from Redmine, thanks for reporting!

Committed in commit:20a7912
