ChiliProject - Feature # 930: Add resolution field to Bug tracker by default

Status:	Declined	**Priority:**	Normal
Author:	Radim Koláŕ™	**Category:**	Issue tracking
Created:	2012-03-13	**Assignee:**	
Updated:	2012-03-13	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	If ticket state is _Closed_. There needs to be another field describing why ticked was closed. This field is pretty standard for issue trackers and chiliproject should have it by default. It will be also useful for imports from _Trac_.

In Trac it can be:

Fixed
Invalid
WorksForMe
Duplicate

History

2012-03-13 07:18 pm - Eric Davis

- Status changed from Open to Declined

Disagree. As a general purpose tool a resolution field doesn't make sense in all cases.

If you want a resolution field you can use a custom field for it in your version.
