

ChiliProject - Bug # 938: Extra lines in view section of the repository

Status:	Open	Priority:	Normal
Author:	Kranti Konganti	Category:	
Created:	2012-03-20	Assignee:	
Updated:	2012-03-28	Due date:	
Remote issue URL:			
Affected version:			
Description:			
<p>Hi, I recently upgraded from chiliproject v2.6.X to v3.0.0. Everything seems to work nicely, except when viewing code in the repository.</p> <p>There seems to be an extra line between each line of code. Also, I use redmine_repo_pygments for syntax highlighting. This plugin worked perfectly with my v2.6.X install with some minor modifications to <code>_file.rhtml</code> and <code>annotate.rhtml</code> files.</p> <p>In <code>@_file.rhtml@</code>, this line</p> <pre><pre> <% syntax_highlight(filename, to_utf8(content)).each_line do line %> </pre></pre> <p>was changed to</p> <pre><pre> <% syntax_highlight(filename, to_utf8_for_attachments(content)).each_line do line %> </pre></pre> <p>and in <code>@annotate.rhtml@</code>,</p> <pre><pre> <% syntax_highlight(@path, to_utf8(@annotate.content)).each_line do line %> </pre></pre> <p>was changed to</p> <pre><pre> <% syntax_highlight(@path, to_utf8_for_repositories(@annotate.content)).each_line do line %> </pre></pre> <p>Although the core <code>_file.rhtml</code> and <code>annotate.rhtml</code> in v3.0.0 comes with these changes, I still see the extra lines.</p>

hi,

As I see You use plugin code_review, right?

Because after adding this plugin I've got the same problem.

And solution for that is to change css style:

application.css:1636

<pre>

```
#content table.issues td, #content table th {
```

```
  border:1px solid #e6e6e6;
```

```
  padding: 6px;
```

```
  text-align:left;
```

```
  position:relative;
```

```
  vertical-align:top;
```

```
}
```

</pre>

exactly padding from 6px to 1px for example as I did.

can someone from core dev could confirm that it could be added as fix for this issue?

In my opinion with 1px is ok.
