ChiliProject - Bug # 954: Error when branching in SVN

Status:	Open	**Priority:**	Normal
Author:	BjÃ¶rn Blissing	**Category:**	SCM
Created:	2012-03-27	**Assignee:**	
Updated:	2012-03-27	**Due date:**	

Remote issue URL:	
Affected version:	3.0.0
Description:	When trying to create a new branch in SVN repository I get the following error:
	@
	Copy C:\code\test to https://www.myurl.com/svn/test/branches/my_branch, Revision HEAD
	COPY of '/svn/test/!svn/bc/15/trunk': Could not read status line: Secure connection truncated
	@
	When I googled this error I found the following thread on the redmine board:
	http://www.redmine.org/boards/2/topics/7593
	So I changed my host file to contain:
	@SVNPathAuthz off@
	This workaround seems to work for now. But I'll guess is not solving the real problem at hand.
	This patch seems related:
	http://www.redmine.org/issues/9066
