

ChiliProject - Bug # 956: Changeset find_committer_user

Status:	Open	Priority:	Normal
Author:	Robert Mitwicki	Category:	
Created:	2012-03-27	Assignee:	
Updated:	2012-05-19	Due date:	
Remote issue URL:			
Affected version:			
Description: What steps will reproduce the problem? <ol style="list-style-type: none">1. Add user with first name: John2. Add user with login: john3. run test: test_auto_user_mapping_by_email(RepositoryTest) [test/unit/repository_test.rb:153] <p>What is the expected output? Pass test</p> <p>What do you see instead? Test fail</p> <p>I think it happen because of those lines (app/models/repository.rb):</p> <pre><pre> 187 elsif committer.strip =~ /^(^[<]+)(<.*>)?\$/ 188 username, email = \$1.strip, \$3 189 u = User.find_by_login(username) 190 u = User.find_by_mail(email) unless email.blank? 191 user = u </pre></pre> <p>and wrong committer value, which is: 'john <jsmith@somenet.foo>' as I understand that, the test have just wrong value (because before email should be not username but login) and after adding user with the same login it just can't find proper user.</p> <p>If someone can confirm that I can prepare a patch to fix that.</p>

Tests should be run with RAILS_ENV=test, esp. with a clean database.
