

ChiliProject - Bug # 961: deactivated users still get notified on issue changes

Status:	Declined	Priority:	Normal
Author:	Harald FrieÄnegger	Category:	User accounts
Created:	2012-04-03	Assignee:	
Updated:	2012-04-03	Due date:	
Remote issue URL:			
Affected version:			
Description:	users that got deactivated can't log in and can't be chosen as assignees on tickets. however they still get notifications for issues they are watching. iiuc, deactivating a user is some way of tentative deleting the account with the option to re-activate him. if that's the case, no notifications should be sent, right?		

Associated revisions

Add overflow:auto to the content div (closes #676, #748, #961).

There shouldn't indeed. Can you try to narrow down on what events they get notified?

i made some investigations on this, because i'm the maintainer of harald's chiliproject installation :)

the notifications described are made by the "redmine_reminder" plugin and it seems that this plugin doesn't respect users' active state. all other notifications on editing tickets aren't sent to deactivated assignees/watchers/creators ...

so i'll check out the plugin and try to fix it there.

Great, thanks for the info and feedback!
